

“Toxics Release Inventory 101, EPA’s Next Gen Compliance Tools & Indoor Air Quality”

Regulations. By law you are required to comply. However, compliance requirements can often seem overwhelming and confusing, and rule changes can catch you completely off guard and leave your head spinning.

Wouldn't it be nice if regulators would provide hints and tips to help you better understand what is required of your business? Would you like the opportunity to meet with regulators and industry experts in a small setting where questions are welcome? This workshop provides just that opportunity.

Join us at the Iowa Strategic Goals Program 1-day workshop on May 3, 2016! In the morning, attendees will hear from EPA Region 7 compliance officers about EPA's Next Gen Compliance Tools and common trip-ups in reporting Toxic Release Inventory (TRI) emissions. In the afternoon we'll hear from the Iowa Occupational Safety and Health Administration (Iowa OSHA) regarding indoor air quality, including common issues; the impact on your employees; potential liabilities; and, steps you can take to ensure compliance.

These sessions will provide plenty of time for open discussion / Q&A, so take advantage of this opportunity to learn, network and share ideas!

This workshop is the 19th in a series offered by the Iowa Strategic Goals Program. Open to all Iowa manufacturers, the materials presented will apply to a broad range of industrial sectors. The following comments were received from previous workshops:

- “Good information presented – relevant to all types of industries.”
- “Very good class, good information, timely topics.”
- “Speakers were very well educated in topics discussed.”
- “I think this is a great forum to allow businesses to get good compliance information with the regulatory agencies.”

Sponsored by the Iowa Strategic Goals Program in partnership with U.S. Environmental Protection Agency's Region 7, the Iowa Department of Natural Resources and the Iowa Waste Reduction Center.
